

**PHASE III REOPENING OF TERRITORY'S BORDERS**  
**STEERCO PUBLIC BRIEFING #8 - Nov 23**

All travellers to the British Virgin Islands must obtain a BVIGateway Travel Authorisation certificate prior to arrival. This online portal will facilitate registration for authorisation to travel to the BVI. Each traveller, this includes children, must complete an application to obtain a travel certificate for presentation to airline authorities.

Applications must be completed 48 hours prior to travelling.

Log onto [bvigateway.bviaa.com](https://bvigateway.bviaa.com):

- Complete the required health, immigration and customs forms.
- Upload the relevant documents at the respective prompts.
- At this point, submit your application for review.
- Upon review of your application you may be required to provide missing and/or additional information in order to finalise your application.
- Once you have started the application process, you can save your information and log back in later to complete.
- A COVID19 PCR test that is negative within five days of your arrival must be completed by a medical library that has the appropriate certifications.

Once you have received your travel authorisation you can now proceed to make your travel arrangements.

Be sure to keep a printed or electronic copy of the travel authorisation. Also, keep your negative PCR results with you along with your ticket and passport to check-in and board your flight. Each traveller, including children, must have completed an application to obtain a travel certificate for presentation to airline authorities.

Please note you will not be able to board the flight without your travel authorisation and PCR test results. This certificate streamlines the process at the airport and removes the need to fill out paper forms.

BVILove awaits you!
